

RESEARCH PAPER

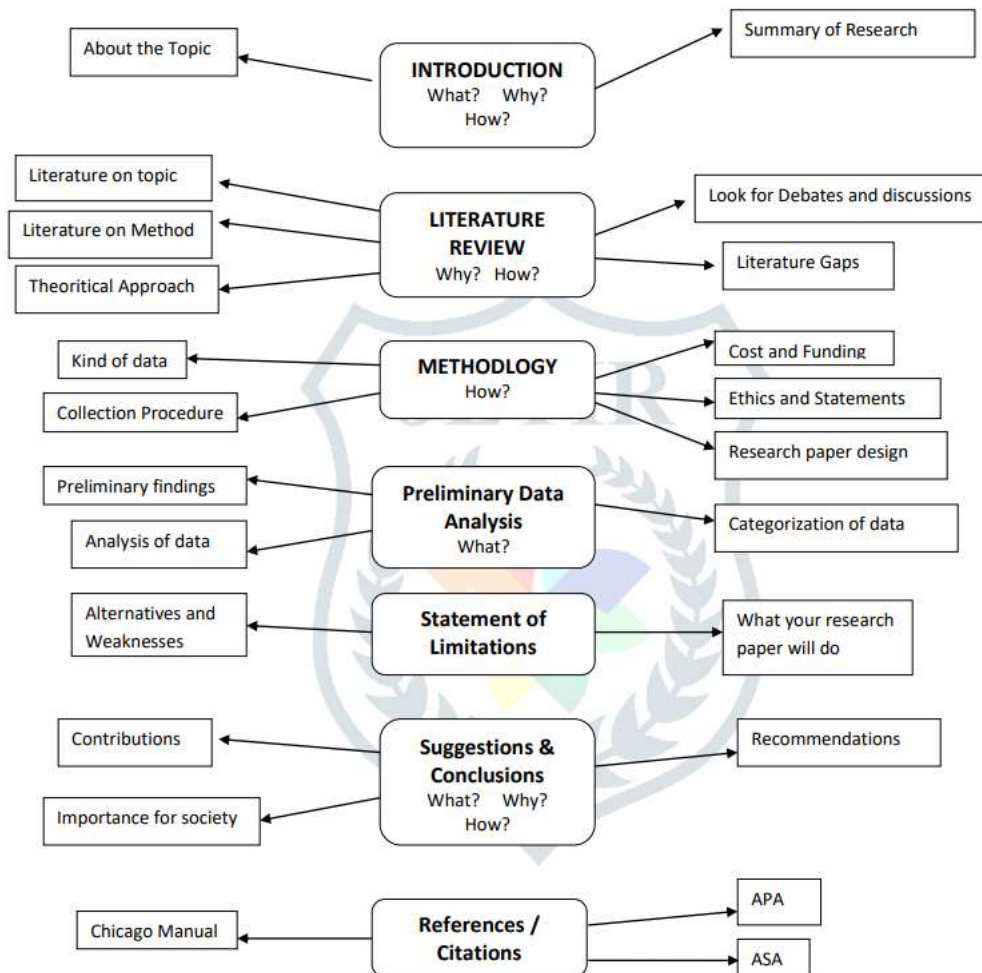

A research paper is an expanded essay that presents your own interpretation or evaluation or argument. When you write an essay, you use everything that you personally know and have thought about a subject. When you write a research paper you build upon what you know about the subject and make a deliberate attempt to find out what experts know. A research paper involves surveying a field of knowledge in order to find the best possible information in that field.

Steps to write a Research Paper

If you are writing research paper for the first time, it may seem frightening, but with good organization and focus of mind, you can make the process easier on yourself. Writing a research paper broadly it involves four main stages: **choosing a topic, researching your topic, making an outline, and doing the actual writing.** The paper won't write itself, but by planning and preparing well, the writing practically falls into place. Essentially a narrower research paper consists of 10 major sections. The number of pages may vary depending upon the topic of research work but generally comprises up to 8 to 10 pages. These are:

1. Title
2. Abstract
3. Introduction
4. Literature review
5. Methodology or System model
6. Research Analysis or Research Discussion
7. Results and discussion
8. Recommendations/suggestions
9. Conclusions
10. References/Citations

RESEARCH PAPER WRITING FLOWCHART

Abstract: An abstract is a brief summary of a research article, thesis, review, conference proceeding or any in-depth analysis of a particular subject or discipline, and is often used to help the reader quickly ascertain the paper's purpose.

Introduction: It's the foremost preliminary step for proceeding with any research work writing. In this section details about the topics are elaborated. In this section the reason for choosing this topic is also mentioned.

Methodology: In this section which method we are using for writing our research is written like Primary which is personally going to field or through questionnaire method or by secondary method which is from books, journals, newspapers, and Internet etc.

Results or Finding: This section also has more details about your research in continuation with above section. In this section all the research matter will be summed up into points so that the reader can understand easily.

Conclusions: This section will have conclusions about your research. As by adopting the above practices all major constructs of a research paper can be written and together compiled to form a complete research ready for Peer review.

References: This section will have all the citations which we have used in writing our research. The major citation types used in research paper are;

- APA
- ASA
- CHICAGO MANUAL

What is the difference between scientific article and Research paper?

A research paper is a paper containing original research. That is, if you do some work to add (or try to add) new knowledge to a field of study, and then present the details of your approach and findings in a paper, that paper can be called a research paper.

A scientific paper is any paper on a scientific subject.
